PROFILE

As a highly skilled Flutter developer with 6 years of extensive experience, I am proficient in creating visually stunning, high-performance mobile applications that run seamlessly on iOS and Android platforms. I am passionate about transforming innovative ideas into user-friendly and engaging digital experiences and confident in my ability to deliver exceptional results.

WORK EXPERIENCE

RYVL Team | *Flutter Developer*

NY, United States of America | **05/2026 - Present**

- Played a key role in building “RYVL” – an interactive soccer fantasy chat game where users can challenge friends, make match predictions, compete on leaderboards, earn coins, and unlock rewards.
- Worked on developing engaging mobile features such as friend leagues, weekly and custom predictions, in-app chat, ranking systems, and reward-based user interactions to create a more competitive and social experience.
- Contributed to API integrations, performance improvements, and overall app stability, helping deliver a smooth and enjoyable fantasy sports platform for football fans across mobile devices.

Tendo by Tonik | *Flutter Developer*

Makati, Philippines | **03/2023 - Present**

- Developed and contributed significantly to the success of “Tendo by Tonik” – an innovative installment-based payment solution for online shopping in the Philippines, designed to provide customers with a more flexible, convenient, and accessible way to manage payments for their online purchases.
- Spearheaded end-to-end mobile app development, working closely with cross-functional teams including backend developers, product managers, QA engineers, and UI/UX designers to deliver a smooth and reliable user experience.
- Successfully integrated third-party APIs and payment-related services to enhance the app’s functionality, improve transaction flow, and support the platform’s growth by making installment payments easier and more user-friendly for customers.

Tentony | *Flutter Developer*

Baku, Azerbaijan | **07/2022 - 02/2023**

- Developed and contributed significantly to the success of “Tentony” – an expansive e-commerce application that has established itself as a prominent online shopping and selling platform in Azerbaijan.
- Collaborated closely with UX/UI designers to implement visually appealing designs, playing a key role in positioning the app as a top-rated event management solution on both iOS and Android platforms.
- Resulted in heightened user engagement and widespread recognition, solidifying “Tentony” as a market leader in the region's e-commerce industry.

Baku Creative Projects | *Flutter Developer*

Baku, Azerbaijan | **03/2021 - 06/2022**

- Spearheaded the development of “Wibty” – a pioneering social media platform acknowledged as Azerbaijan's first successful venture in this domain.
- Engineered an innovative application that allows users to effortlessly post, listen to music, and connect with new contacts concurrently, creating a distinctive social environment.
- Employed the “BLoC” package for streamlined state management, resulting in a 25% reduction in app loading times and a marked enhancement in overall user satisfaction.

Frazex LLC | *Flutter Developer*

Baku, Azerbaijan | **10/2020 - 12/2022**

- Engaged in the development of diverse mobile applications, notably contributing to e-commerce platforms like “Rahat Kart”, “Bouquet” and “Lilac.az”.
- Additionally, played a pivotal role in creating food delivery applications, explicitly working on client-side interfaces and partner/courier interfaces such as “Tezibu Partner” and “Tezibu Courier”.
- Actively collaborated with clients throughout the requirements-gathering phase, ensuring a comprehensive understanding of objectives, ultimately reducing development iterations substantially.
